

COVID 19 PROTOCOL

In Área Náutica we have created a protocol of prevention and hygienic and sanitary measures to guarantee your safety and that of our employees:

We disinfect our boats with an ozone machine; thanks to ozone, a much more thorough sanitisation and sanitisation is obtained.

- The boat's equipment, paddle board, snorkel, rods, kayak, etc.... will be disinfected with hypochlorite.

- Shoes will be removed before entering the boat.

- Use of face mask by the crew.

- Hydroalcoholic gel available to all sailors.

- The kitchenware available on the boat will be for single use only.

- Our boats are spacious and have a fly-bridge, (first floor) which allows us to guarantee a safe distance from the crew.

- Flexible cancellation or change of our charters.
